Why test your blood glucose (blood sugar)?

To help you and your healthcare team adjust your diabetes treatment plan when needed. A OneTouch® blood glucose meter with ColourSure™ technology, helps you better understand your results.

What are my blood sugar targets?

Time	My Target Range*
 Before meals	
 2 hours after start of a meal	
 Bedtime	
Other times	

*Always ask your doctor or other health care professional about your unique blood glucose target ranges. And don't forget to write them down to help guide you to make decisions based on your test results.

How to use your logbook

Week of 8/9 1 = before meal = after meal = insulin/meds = bedtime

	Breakfast			Lunch			Dinner			Snack	Other	Bed
Day												
Mon	70 2	123	6 4	120	160	8	180	210 5				
Time		8:00 am 3										
Notes:	Pizza lunch, Pasta dinner 6											
	Breakfast			Lunch			Dinner			Snack	Other	Bed
Day												
Mon												
Time												
Notes:												

Use this logbook to help you learn how food, medication

and exercise affect your blood sugar. Then make healthy decisions each day to better manage your diabetes. Here's how to work with your logbook:

- 1 Fill in the date.
- 2 When testing blood sugar before and after meals, and the "after-meal" result in the column
- 3 Write down the time you test your blood sugar.
- 4 Write down any amount of medication you've taken
- 5 When your result is high or low, circle it so you can
- 6 Use the comments section to remark on anything

write down the "before-meal" result in the column

(insulin and/or diabetes pills), in the column.

see it at a glance.

important like meals eaten, exercise, or stress.

Week of _____

When testing your blood glucose, hold the lancing device firmly against the side of your finger. Fewer nerves on the side can make it less painful than the center of your fingertip.
